Facebook : B & M Scientific

Mr Abdul Majid Hargey

Since its inception over 30 years ago, B&M Scientific has grown into a market leader, building strong and sustainable relationships with all the major scientific, educational institutions, governmental healthcare laboratories, industry laboratories as well as food production laboratories. B&M Scientific has extensive experience in fulfilling small to large orders within South Africa and in the rest of Africa, successfully securing our reputation as a company that delivers and exceed customer expectations by being customer-centric.

We supply all essential laboratory equipment, laboratory consumables, laboratory reagents, and medical supplies. We also have a comprehensive range of personal protective equipment (PPE). We have a range of strategic suppliers & partners, both locally and internationally that enables B&M Scientific to supply to and focus on these industry sectors:

Biotechnology, Chemistry, Food Laboratory,
Industrial Laboratory, Medical, Pathology & Forensics.

COMPANY BACKGROUND

B & M Scientific cc (BMS) was founded in September 1989 by Mr A.M. Hargey (M.Sc) who had been studying, working and teaching in the science field. This need to provide scientific expertise and service, coupled with a commitment to service excellence is the core basis for the company's existence today. BMS specializes but is not limited to the microbiology and biochemistry fields and is steadily growing with branches in the main centres of South Africa such as Cape Town, Durban and Pretoria. BMS was born out of the dark shadow of South Africa's past, thus the industry was untouched and still reflected the inequalities which it was still shedding.

VISION

As a black enterprise, BMS continues to grow by the opportunities created and the excellent service it provides within the retail lab sector. It has and will continue to make its mark as a dominant player. Our aim is to become the largest provider & source of equipment to laboratories in Africa with quality products and services which enhance and help the individual forming a lasting relationship between company and client. We should thus serve as a role model for black economic empowerment which will encourage future black entrepreneurs to enter the industry in the new South Africa.

MISSION

We aim to be a reliable, efficient and affordable source of laboratory consumables to the entire scientific community without compromising on quality, providing product knowledge and customer service. This can only be achieved through technology (internet, EDI etc) which BMS is equipped with giving instant access to customer information, thus allowing us to respond quicker to enquiries and orders and provide the latest cutting edge information and products whether by phone, fax or email. It is also our goal to provide resources to the previously disadvantaged communities where the need is now greater. We therefore endeavour to provide a comprehensive service to the research and scientific communities headed by well qualified and experienced personnel and thus building a distinct identity by the quality brands of equipment and services provided. Our service should represent our company, our products should complement it.
